
Maintain focus on the material that is relevant to you

Percall is a **PTC Authorized Training Partner (ATP)** and we deliver standard PTC training courses on behalf of PTC on customer premises saving time and cost of delegate travel and living expenses. These classes should be booked through PTC.

In addition, Percall offers **specific role training tracks** with courses that are dedicated to common business and technical roles in PLM. These training tracks have dedicated content to allow delegates to **maintain focus on the material that is relevant to them.**

Our course materials are modular and Percall's training experts are happy to discuss and configure tailored courses if customers have particular time constraints or need to skip inapplicable content. This process is quick and easy.

All the courses that Percall delivers are "hands on" but Percall understands that it might not be easy to prepare the required training hardware. Although Percall does not supply hardware, we do offer a service to configure customer hardware ready for classes

Why Percall?

- ▶ PTC Certified Trainer (ATP)
- ▶ Depth knowledge of latest product developments
- ▶ Standard or Tailored training, customized to your business
- ▶ Training manual including theory and practical exercises
- ▶ Optimized courses and individual support
